"Creativity is intelligence having fun"
Albert Einstein

"Creativity is intelligence having fun"

With this phrase, Albert Einstein expressed his concept of creativity and we at Hylab embrace this idea. Through continuous improvement, we enhance a world-class product range by designing what doesn't yet exist.

So whether you require specific chemical or paper compatibility, brand customisation or any other bespoke solution, our experts will make it a reality.

The Hylab difference

Hylab's reputation as a touchstone for product quality and cutting-edge manufacturing owes itself to continued investment in the latest technology and the industry's leading technical specialists.

The pumps that bring high precision and superior chemical compatibility to every Hylab soap dispenser are produced in our state-of-the-art automation facility, where unwavering quality control ensures that every unit meets our exacting standards.

Hylab customers also benefit from exclusive developments such as our patented Tris System, a multifunction paper dispensing solution that allows for several options from a single backplate by simply switching inserts.

Then there's the Modular range – instantly recognisable around the world for its blue-drop frontage – which offers unmatched versatility with options including compact, industrial and touch-free models that adapt to your changing needs.

Hylab's commitment to post-consumer recycled (PCR) materials makes us the provider of choice for retailers and end consumers looking to meet and exceed their sustainability targets.

The 2Life range offers the perfect balance between design, performance and material quality, so ask us for environmental certifications to discover the impact these systems can have on your carbon footprint.

"Creativity is intelligence having fun"

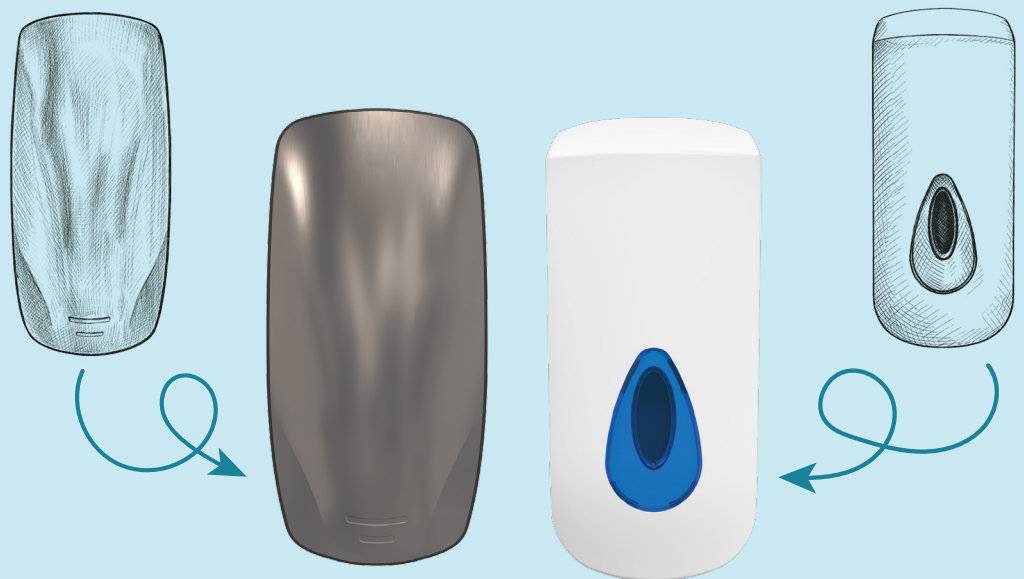

At Hylab Dispensers, we believe that creativity and intelligence go hand in hand.

Continuous innovation drives the development of our product range

Designs that combine **practicality, performance and aesthetics**

Custom solutions tailored to specific requirements and applications

Expert support to deliver bespoke designs, branding and compatibility needs

Why Choose Hylab?

At Hylab, our specialist in-house teams are the backbone of every dispenser we produce:

- **Custom Design Experts** – Tailored dispensing solutions developed with precision and innovation.
- **Strict Quality Control** – Every product undergoes thorough checks to ensure top-tier reliability.
- **Dedicated Manufacturing Team** – Skilled professionals crafting durable, high-performance dispensers.

Backed by years of experience and industry know-how, we deliver exceptional dispensing solutions that meet the highest standards in function and form.

Select your perfect fit

Choosing your preferred soap dispenser from our extensive and versatile product range, design a fully customised system tailored to your specific operational needs and requirements, including:

- **Environment & usage** – where it will be used and how frequently
- **Dispensing type** – manual or touch-free operation
- **Soap compatibility** – suitability for the required soap or sanitiser type
- **Capacity & refilling** – size and ease of replenishment
- **Durability, hygiene & cost** – build quality, cleanliness and overall value

Tris delivery system

Our patented Tris System enables you to easily adapt a dispenser's function by simply switching the delivery kit, transforming it to suit different applications.

- Converts an interleaved toilet paper dispenser into one for jumbo rolls or interleaved hand towels
- Modular design allows quick and simple installation
- Cost-effective solution for changing requirements
- Reduces transport and storage needs
- Supports sustainability with zero material waste
- Provides maximum flexibility for the end-user

Ecoline

Ecoline is Hylab's everyday range that combines ease of use and clean, simple lines.

Suitable for every environment, it's conveniently packed in multiple boxes to reduce waste and save you time.

The series is complete with paper and soap dispensers to meet every requirement, with a standard white opaline colour allowing consumable level to be easily checked. If you'd like to benefit from Hylab's customisation service, please let us know which colour you want your Ecoline dispenser and we will be pleased to create it for you!

Vela

The sleek, modern look of the stainless-steel Vela range makes it the perfect addition to any contemporary environment.

Equipped with Hylob's patented Tris System and available pre-configured or as base units and separate kits, Vela offers versatility, adaptability and convenience for your paper dispensing needs.

Vela is manufactured from 1.2mm-thick 304 stainless steel for durability, longevity and corrosion resistance while a customisable window allows for branding and promotional opportunities, enhancing the range's visual appeal and personalisation.

High Hygiene

A specialist collection of dispensing solutions developed to meet the highest hygiene standards in demanding environments.

Designed for control and reliability, each system supports effective infection prevention with easy maintenance and consistent performance.

Built with durability and practicality in mind, these solutions ensure safe, efficient operation where hygiene is critical.

Multiflex

Multiflex

Custom dispensing solutions designed to safeguard against cross-contamination.

Prevent cross-contamination with the hygienic, innovative Multiflex system, which replaces sealed cartridges and pumps in one for the ultimate dispensing solution.

Select from liquid, spray and foam pumps, exclusive to your products, alongside easy refill changes with keyed or keyless opening.

A forward-thinking collection of dispensing solutions designed with sustainability at its core.

Manufactured using post-consumer recycled materials, each Eco system helps reduce environmental impact while maintaining reliable performance.

Combining durability with responsible design, these solutions support effective hygiene practices alongside your sustainability goals.

2Life

A classic look, sustainably re-imagined, crafted with essential simplicity and environmentally conscious.

With close to perfect comparison to virgin materials in both physical and mechanical properties as well as bulk packaging, 2Life offers a cost-effective and sustainable approach to reduce waste and optimise transport and storage.

Introducing
2Life
 by Hylab

Our 2Life
 material is 100%
 recycled, including
 85% PCR and 15% PIR

- Hylab's 2Life range is a **big step along our path to positive change**, offering the same trusted performance our customers expect, but with a significantly reduced environmental impact.
- Within the 2Life range, there are 12 trusted Hylab products, **all produced using our new PCR material**, with the entire external structure, including the clear windows, made from this recycled source.
- 2Life products are **designed to enhance sustainability** by utilising continuous improvements in eco-conscious materials and supporting more responsible production practices.
- **PCR (Post-Consumer Recycled)** refers to materials recovered from end-of-life commercial products and reprocessed, while **PIR (Post-Industrial Recycled)** is waste from manufacturing processes, often known as re-grind, and can include both virgin plastic and PCR.

Hylab's promise:

Hylab's Path to
Positive Change

Giving Plastic a
2nd Chance

Produced in
100% Recycled plastic

2Life Key Features

Hylab Quality as Expected

Hylab's promise is to combine trusted hygiene expertise with a responsible approach to sustainability.

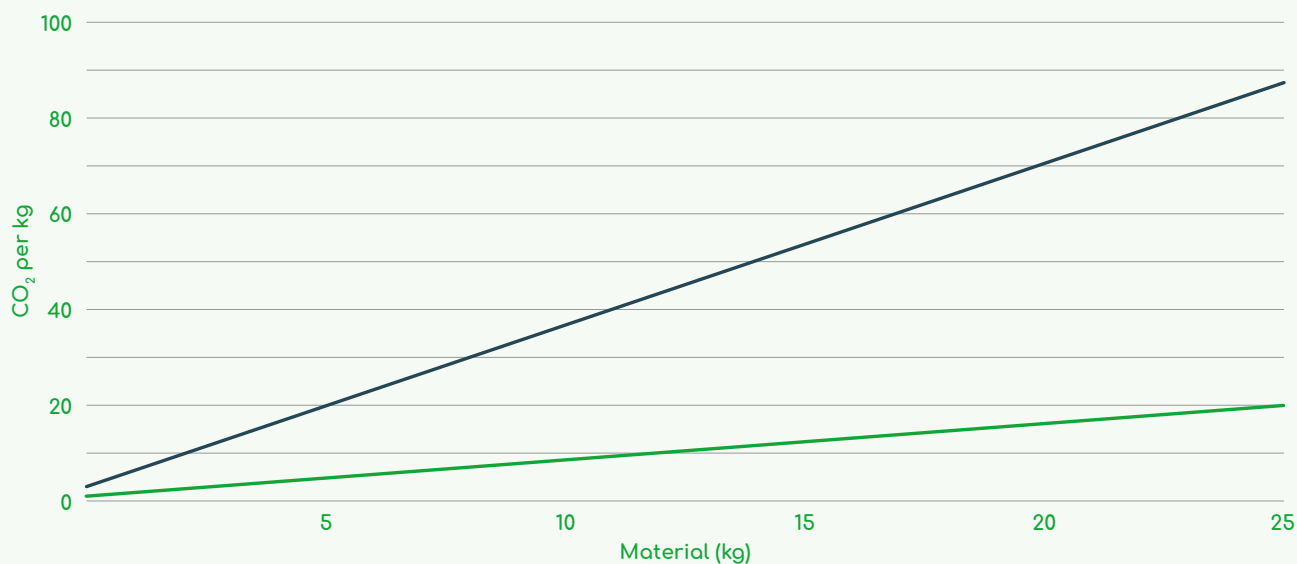

Translucent PCR

We are the first in the hygiene sector to introduce a clear PCR ABS into a dispenser. Every dispenser in our 2Life range features this clear PCR ABS material.

Reduced Carbon Footprint

The 2Life materials offer a significant reduction on the carbon footprint a dispenser has. Every Kg of our 2Life material emits 2.7kg of CO₂ less than standard virgin ABS plastic into the atmosphere. Our 2Life products also prevent the plastic from the original products (white goods etc.) from being dropped into landfill.
